Humanity and Health Foundation
Safeguarding & Duty-of-Care Readiness (2026)

Humanity and Health Foundation (HHF) is committed to safeguarding the dignity, rights, and well-being of all individuals engaged in its programs, including beneficiaries, volunteers, staff, partners, and community members.

HHF maintains a safeguarding and duty-of-care framework designed to prevent harm, promote ethical conduct, and ensure appropriate responses to concerns or incidents. This framework applies across all operational regions and program activities.

Safeguarding measures include clear codes of conduct, role-based responsibilities, reporting and escalation procedures, and mandatory awareness training for individuals involved in HHF activities.

Duty-of-care obligations are integrated into program planning, risk assessments, and partner engagements to ensure safe, respectful, and inclusive environments.
